

Carbon Reduction Plan

Supplier name: Waterless Limited

Publication date: 22/01/2026

Commitment to achieving Net Zero

Waterless Limited is committed to achieving Net Zero emissions by 2040

Baseline Emission Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023
Additional Details relating to the Baseline Emissions calculations.
For the purpose of this carbon reduction plan, the baseline emissions calculations have been taken from 2023. This is due to previous years being measured in alternative methods and whilst we have worked towards sustainable alternatives and schemes to achieve Net Zero this has not been formally calculated until now. To calculate our Scope 1,2 & 3 emissions we have used the Government recommended Business Carbon Calculator Normative. We can only deduce that our Scope 1 emissions have a total of zero due to only using renewable energy for electricity, negligible amount of gas and do not own or lease our own vehicles.
Baseline year emissions:

EMISSIONS	TOTAL (tCO2e)
Scope 1	0
Scope 2	0.102
Scope 3 (Included Sources)	213 Business Travel • 1.25 Upstream Transportation and Distribution • 23.1 Purchased Goods and Services • 166 Capital Goods • 23.1
Total Emissions	213

Current Emissions Reporting

Reporting Year: 2025

EMISSIONS	TOTAL (tCO2e)
Scope 1	0
Scope 2	0.102
Scope 3 (included Sources)	213 Business Travel • 1.25 Upstream Transportation and Distribution • 23.1 Purchased Goods and Services • 166 Capital Goods • 23.1
Total Emissions	213

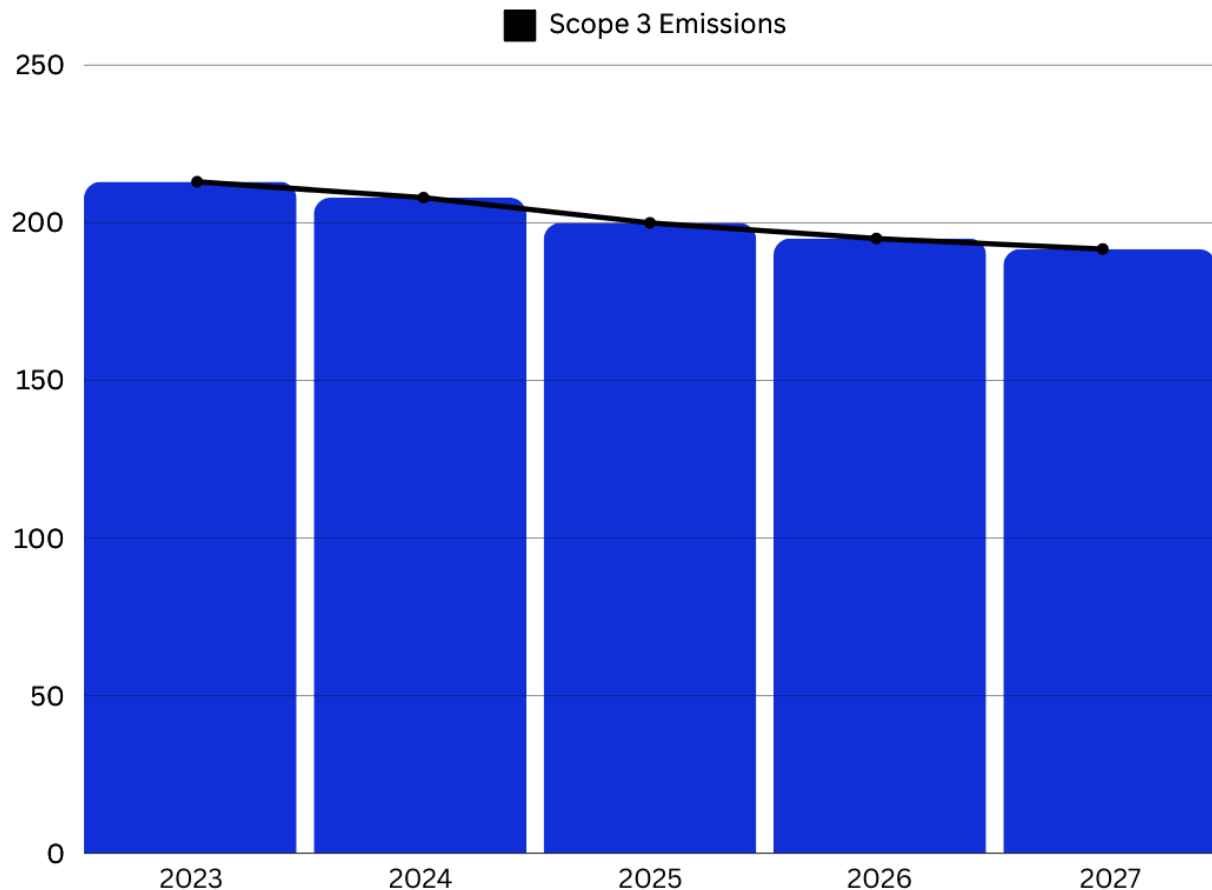

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We have already achieved Scope 1 reduction to zero and our Scope 2 is currently a negligible amount, thus we will be concentrating on reducing our Scope 3 emissions.

Our projection is that Scope 3 carbon emissions (emissions and output) will decrease over the next five years by 10% based on the 2023 baseline. This reflects emissions purchased raw materials and goods, incoming and outgoing deliveries and production waste. This category represents the majority of total Scope 3 emissions.

Expected progress against this target can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

Due to our baseline reporting year only being last year we are unable to demonstrate the effectiveness of any historical carbon reduction projects, however, since 2019 we have completed the following initiatives:

- Gained Ethical Accreditation by the Good Shopping Guide
- Endorsed Cruelty Free by the Nature Watch Foundation
- Converting to 100% renewable energy to run our factory
- Switching to green companies to deliver our goods such as Royal Mail and DPD who are investing in green electric vans and have already met their Co2 targets.
- Sourcing components from UK suppliers
- Switching components to biodegradable and PCR materials
- Introduction of FSC accredited cardboard for packaging

In the future we hope to implement further measures such as:

- Investigate Transport Management System to assess areas where efficiency can be improved through logistics and distribution
- Transitioning any future company vehicles from petrol/diesel to hybrid

- Continued investment in UK manufacturing facilities to ensure more hygiene and personal care products are made in the UK
- Investigate Cycle to Work, Care Share and EV employee support
- Review our Sustainable Sourcing Policy with current UK suppliers
- Continue to upgrade old equipment with the latest technology to improve efficiency
- Ensure we are signed up to the latest accreditations for transparency

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

A handwritten signature in black ink, consisting of a series of loops and strokes, positioned above the printed name and date.
